

# JIRA Ticket Management Clone

15 September 2021 16:18

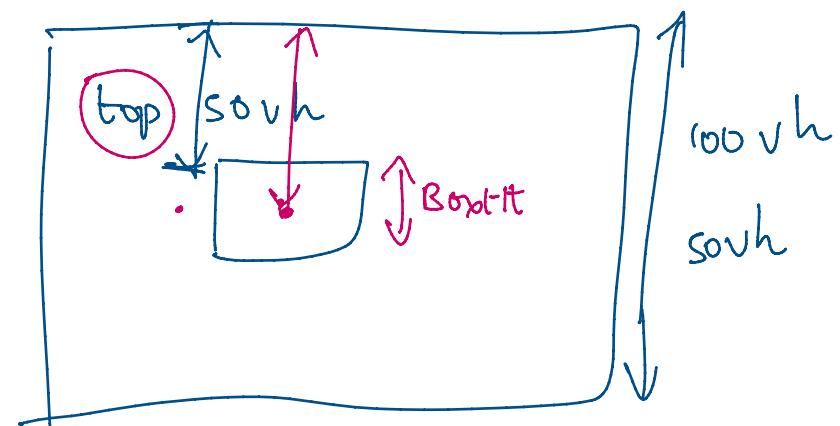

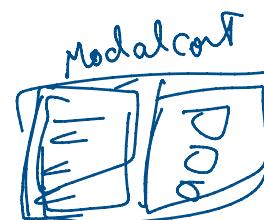

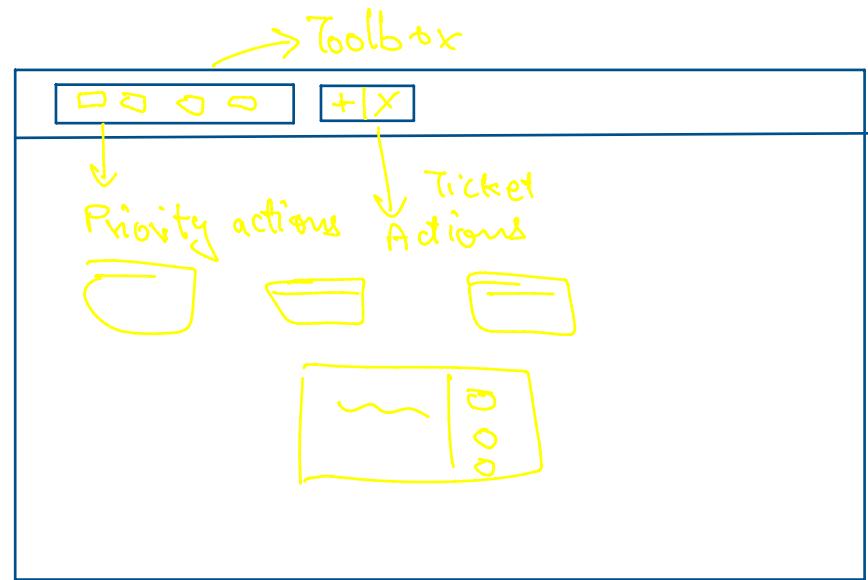

→ Toolbox  
→ Create Ticket  
    → Add Btn Func  
    → Modal Generate

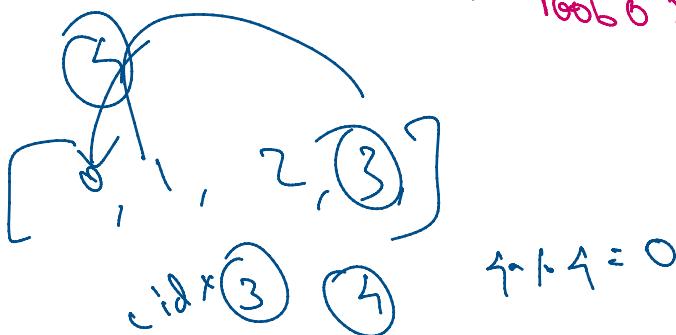

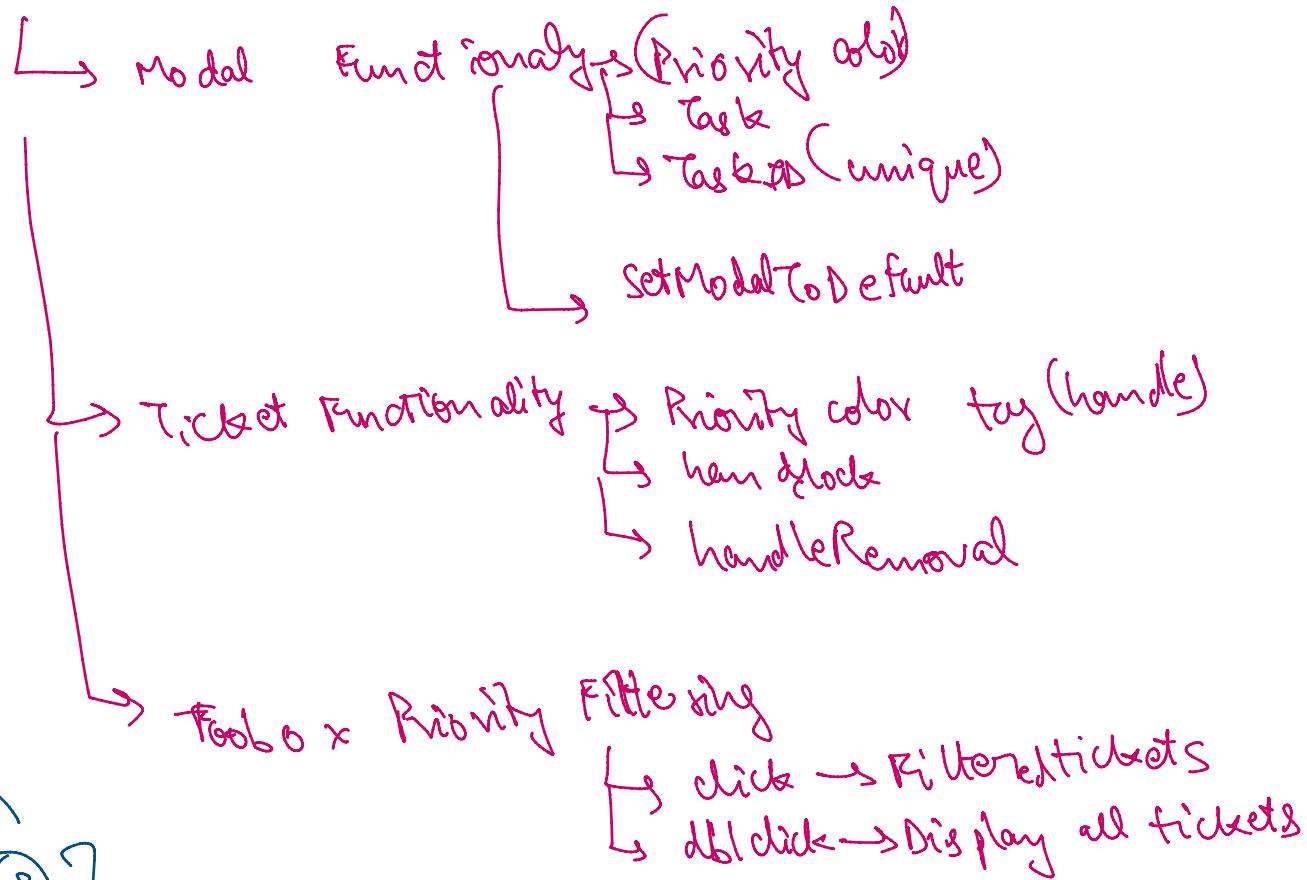

css  
→ visibility → ht, wd  
    → bgc.

$$\text{calc}((100vh - Boxht)/2)$$

## DOM Functionalities

## Web Storage API (Browser)

↳ Set of mechanisms

↳ key-value  
obj: JS object

{ - : -  
- : -  
} -

\* LocalStorage → Expiry: X

\* Session Storage

↳ Expiry: Browser close X

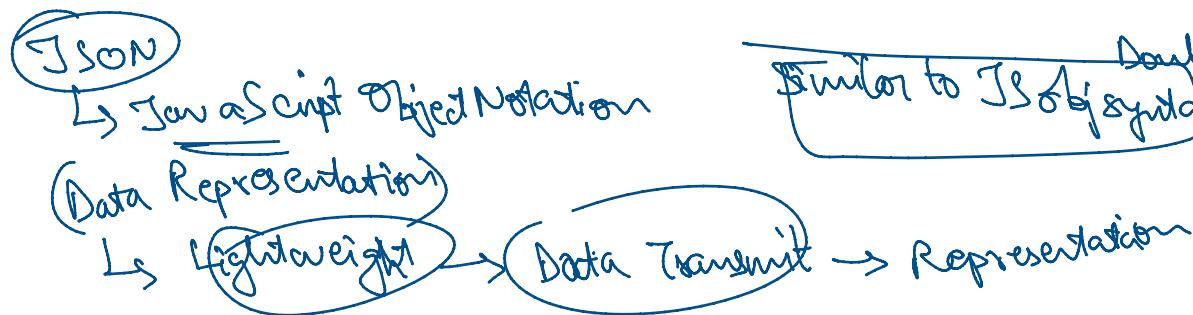

Most Browser  
Data Storage:

SMB

— ↳ Expiry: Browser close X  
Reload X

\* key-value pair → **String**  
For objects ↳ `JSON.stringify()` }  
                  ↳ `JSON.parse()`

encode  
decode

{ "name":  
      }  
      }

Through → Window → Globally  
Browser      object      to all to page

to all to page

:id

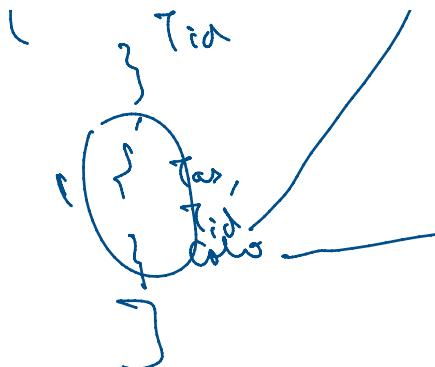

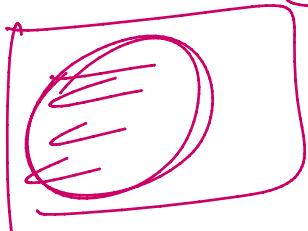

[ 0 {  
      } ]  
      Ticket

- \* Create Tickets
- \* Changing Colors

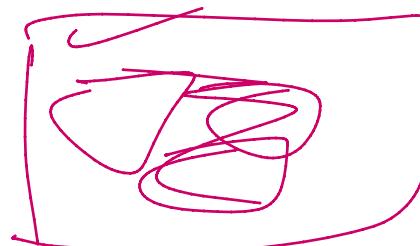

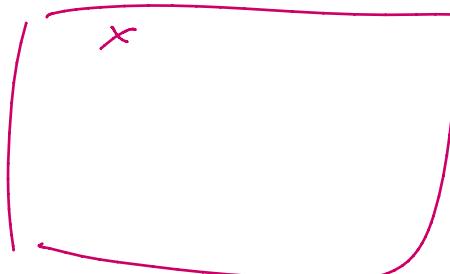

① → color → ○

- \* Changing colors
- \* Task edit

localStorage

① → color → ()

\* Responsiveness
